has undergone very little alteration since the departur of the steamer of the 1st inst. The reported success of the Illinois Commissioners in London, has not had the slight-est favorable effect on the steck in this market, but on the contrary, quotations have since declined. The pubthe contrary, quotations have since declined. The public works of New York, Pennsylvania and Ohio have improved very much and the returns show a very great increase. The receipts of those of this state have increased the largest per cent, and those of Ohio will come next Railroads, most of which are owned by private companies, have increased in productiveness more rapidly than any other works of internal improvement. The receipts from these roads have nothing to do with the State finances, as a tax, or some of them as real exists or personal property is tax, or some of them as real estate or personal property is all the income the different States receive for the privileger granted. The canals of Ohio have made, so lar, very large returns compared with last year, while those o Pennsylvania show but a small increase. The receipts to July 1st, 1844, show an increase of \$92 681 460 over the receipts up to the same period in 1843. The total increase mounts to \$131,847,51; consequently the main line mus pect for a further increase very encouraging. This line of works is to be zold, provided the people at the next election confirm the proceedings of the last Leg islature on the subject. Purchasers can pay in State stock for whatever portion they may take. The intention is to form a company, under certain restrictions from the State tain valuation, but at a price as much beyond as the com pany may choose to give. Whatever the amount th sale of the works may produce, it will reduce the public debt and do away with the necessity for extreme taxation Alabama has been very prompt in providing for the in terest on her State bonds. Funds for the payment of the in this city and London. Maryland does not seem to ac vance very rapidly towards financial prosperity. The public works of the State are doing much better than was anticipated, but very little progress has yet been made to wards the enforcement of the tax laws. Some counties have repudiated, and several tax collectors appointed by the Governor have refused to serve. This looks like any ing but pleasant, and we have very little faith in any State whose inhabitants are able, but unwilling to bea

taxes. Branches, for July, shows but a very slight variation in movement, considered with the previous report, except in

Cotton Trade.

The steamer of the 4th instant from Liverpool is anxiously looked for. It is expected that her advices in relation to the cotton market will not be so favorable as those received by the Great Western. The immense receipts of cotton in the Liverpool market up to the day the Great Western left, must have had an unitavorable influence on prices. Although invoices and bills of lading announcing the shipment of large lots from this side had been received in Liverpool many weeks before the supplies came in, and large receipts were daily looked for, yet the actual arrival of so many bales must have a very injurious effect. The arrivals within a Ecnth—June—amounted to more than one quarter of the whole shipments to Great Britain from the United States for the past year. Judging from these facts, many operators have made up their minds that the steamer of the 4th, now out eleven days, must brig unfavorable reports of the Liverpool market. There is very little doing in this market, the sales of the past two weeks only adding up 7000 bales. We annex a table showing the movements up to the latest dates:

Corn Trade.

This market continues rather quiet. Since the 1st inst. several thousand barrels of flour, principally Ohio, and twenty or thirty thousand busiels of corn have been sold on English account. Genessee flour is held at \$4 31g a \$4 37g. The sales of this kind for Liverpool were at \$4 18g. Wheat brings 90 cents. Oats 30 a 31. Northern corn of a 52. Southern 43 a 59. It is here seen that netwithstanding the demand for English prices of flour, continue to decline, and are rapidly reaching \$4. In the face of the immense crops of this year, more than one-third of which is siready safely harvested, prices must fall. America has never produced so large a supply of grain in any one year as in this.—Wheat, rye, and oats, are equally abundant.

The Trade is evidently improving, says the Pottsville Journal of the 13th instant, and we hope the time is not far distant when our operators will receive some reward for their industry, and the miner and labover, be properly remunerated for their services. The shipments from Lehigh, smount to 12,100 tons, for the week ending on the 29th uit.

29th ult.
Freights from Philadelphia to Eastern ports continue high—to Boston they are quoted at \$1.50 a \$1.57\frac{1}{2}\$; Providence \$1.50\$; New York \$1.
The price o' coal remains firm, White Ash Lump \$3.12\frac{1}{2}\$; Red Ash \$3.25\$; Broken 25 cts per ton more; with an upward tendency.

Red Ash \$3 2b; Broken 25 cts per ton more; ward tendency.
The receipts on the Railroad for the week ending July 5, 1814, was \$12 352 04 Increase of coal transported over last year to July 5, 101 335 tons.
Freights to Philadelphia by Canal, 70 cents - New York \$1 59 - Toll and transportation by railroad \$1 15 and \$1 25 SRIPMENTS FOR THE WEEK ENDING ON THURSDAY VENING LAST.

[Correspondence of the New York Handd L. Philadel.Phila Delibrata, July 15, 1844.

This morning, Judge Jones charged the Grand Jury upon the subject of arming churches, engine houses, &c., which he characterized as illegal, and subjecting any person engaged in the same to indictment for misdemeanor. He examined the article in the constitution, which says, "The right of citizens to bear arms, in defence of themselves and the State, shall not be questioned," and applied it only to those citizens who have arms in their dwelling houses for the protection of themselves and their families. The arming of St. Philip's de Neri church was referred to, also the depositing of arms in several engine and hose houses, and the grand inquest was requested to examine into the facts, and present every individual engaged in the

grand inquest was requested to examine into the facts, and present every individual engaged in the same.

Judge Jones said nothing of the outrages of the Southwark mob, the Grand Juror, Wm. F. Springer, who has been bound over for inciting a riot, was suffered to remain on the panel, and, taking all these things into consideration, the charge is looked upon as a kind of judicial excuse for the mob outrages, and as most fil timed and impolitic. The friends of good order are somewhat disconcerted at this apparent trucking of a high judicial officer to the wild, disorderly, intollerant and bigoted sprit of Philadelphia nativeism, and they begin to think it useless to att mpt to curb the demoralising sans culotteism of the day, when their efforts are neutralized by the appointed grardian of the laws. The Judge should have waited till this excitement was over—till the majesty of the law had been fully vindicated, and the rebellious and persecuting spirit now abroad is effectually extinguished—before he touched upon the facts by which the thoughtless attempt to justify the recent outrages.

Troops have arrived in the city from brigades in the interior, to relieve the eitheren Brigades in succession; to produce the moral effect in Philadelphia, in the Union, and indeed all over the world, which arises from the fact, that this government is strong enough in its citizen soldiery to crush any outbreak against the laws. He intends to show that at the call of authority \$6,000 armed and uniformed citizens can be brought into prompt and effectual action.

The Court of Quarter Sessions was engaged today in the trial of trifling cases. The investigation into the late rious has been suspended for the present. Other testimony is couing to light, and perhaps the examination will be resumed belore suseet.

Wm Sayre Heytham, this morning, filed an affisavit in open court, stating that the report of his testimony in the Philadelphia "Sun," was garbed, and different from he swore to, and that it contained here are also and the sectio
